DETAILED ACTION

Applicant's amendment filed 10/23/2006 has been entered. All pending claims have been carefully reconsidered in view of the claim amendment. Applicant's arguments for patentability of pending claims have been carefully studied by the examiner. Applicant's arguments are convincing in view of the claim amendment and the present application is hereby allowed.

Allowable Subject Matter

Claims 1-3, 5-14, 26-28, 30-31, 37-52 are allowed.

The following is an examiner's statement of reasons for allowance:

As made clear by the prosecution history of the present application, none of the prior art fairly teaches or suggests a configurable integrated optical device comprising, inter alia, plurality of nonlinear elements that are *capable* of being in an 'off' state that, in turn, *allows* the rest of the device to function as optical processing device performing optical re-amplification, re-shaping; or wavelength conversion; or optical data format conversion; or demultiplexing; or clock recovery; or logic operation; or dispersion compensation, as claimed. Prior art devices are *structurally and materially* different from the claimed device, and hence they are *incapable* of possessing the claimed features of the device claimed in the present application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
